CYCLING

Indoor cycling - upbeat stationary bike interval training with high energy music for all fitness levels. Shed fat, improve cardiovascular health, and increase muscle performance and endurance. Get a serious workout from climbs, hills, lifts and sprints - YOU adjust resistance based on actual and perceived exertion. Indoor cycling releases endorphins and dopamine which are pain-reducing and mood and motivation boosting brain chemicals during and after your workout.

YOGA—Strength & Stability

Mobility based class focusing on alignment. Static postures are held at a slower pace. Modifications offered for all levels. Flexibility not required!

Bootcamp

Military-style (think basic training) resistance, cardio and core workouts designed to engage every single muscle in your body, from head to toe. We will use minimal equipment - your body will be your machine.

Each workout will include a solid warm up and cool down. Although the workouts themselves are cadenced, fast paced, and simple these exercises are designed to be intense, so that you'll get results without a lot of complex moves. Every workout can be scaled for beginners to the advanced! This is a 45 minute class.
